

0	Someone lies on the floor with an anvil on their chest. Someone else hits the anvil with a sledgehammer. The anvil shields the first person from most of the sledgehammer's: a) momentum b) kinetic energy c) both d) neither	
	If we interpret "shields from most of X" to mean, "prevents the transmission of the sledgehammer's quantity of X, or less, into the person", then the answer is B, kinetic energy.	Both

6	Meta-debate: Given the questions and answers in this round, which is the better answer to the question?  If we interpret "shields from most of X" to mean, "prevents the transmission of the sledgehammer's quantity of X, or less, into the person", then the answer is B, kinetic energy.	
		Both
